Education

Batangas State University – The National Engineering University Alangilan Campus

Batangas City, Batangas

Bachelor of Science in Computer Science

Thesis: Hybridizing MobileNetV2 with Efficient Convolution and Lightweight Attention

Experience

Batangas State University – The National Engineering University Pablo Borbon Campus

Batangas City, Batangas

Computer Science Intern

June 17, 2025 – July 16, 2025

- Developed a mobile-responsive employee and student portal using Ionic Framework, improving accessibility and user experience across devices.
- Revamped existing front-end features, transitioning from a prior Flutter-based system to a more maintainable hybrid mobile solution.
- Collaborated with a development team to redesign UI components and optimize performance, ensuring smoother navigation for staff and students
- Completed 162 hours of hands-on development, applying front-end best practices, debugging issues, and contributing to feature enhancements

Projects

Lend-A-Spartan

• **Next.js • React • TypeScript • Supabase • Sendgrid • Vercel**

- Secure BatStateU-exclusive web platform that enables students to borrow and lend school essentials with verified authentication, item listings, request management, and QR-based exchange tracking for accountability.

Data Sweep

• **CSS • HTML • JavaScript • Flask**

- Collaborated within a development team to build a full-stack web application using Flask, JavaScript, HTML, and CSS for cleaning and preprocessing messy CSV files through automated operations such as duplicate removal, missing value handling, and format standardization.

ProTomo

• **Flutter • Dart • Firestore Database • Firebase Auth**

- Collaborated with a team to develop an Android-based gamified productivity app using Flutter and Dart, incorporating task tracking and virtual reward systems to enhance user engagement
- Assisted in integrating Firebase Authentication and Firestore Database to manage user accounts and ensure secure, real-time data storage

Skills & Interests

Technical: Python, C++, C#, React, Ionic, Firebase, Supabase, Vercel, SendGrid, GitHub, AI-assisted development tools (e.g. Cursor, Copilot, Codex), MS Office, Google Workspace.

Language: Filipino/Tagalog (Native), English (Fluent)

Interests: Web Development, Backend Development, Game Development, Machine Learning, Artificial Intelligence, NMIXX
